

GenPole Hitch Base

NOTE: A generator should not be run in or in close proximity to a living area. Allow components to cool after running generator before touching.

Installation:

1. Place hitch base onto 2" hitch with open end of flagpole holder base upward.
2. Place receiver pin (not included) the hole of the base that provides the flagpole holder column a safe distance from vehicle.
3. Insert flagpole into base, making sure the pole is inside each of the internal rings of the hitch base.

Removal:

1. After lowering the flagpole completely, remove the flagpole from the base. **DO NOT DRIVE WITH FLAGPOLE IN HITCH!**
2. Remove pin and hitch base from the receiver.
3. Wipe off any exhaust condensation from the inside of the base. It is normal for water to be present at the base during operation.

Positive feedback is greatly appreciated, but if you are not satisfied, please contact us.
